

# SONEX Ceiling and Wall Tiles

## What are Ceiling and Wall Tiles?

SONEX Contour ceiling and wall tiles are made from the same acoustical material our famous SONEX Acoustical Foam is made from. This brings famous SONEX acoustics to ceiling tiles—and a new way to create great acoustics with our glue-on tiles.

## Drop-In or Glue On

You can purchase our tiles two ways: In a lay-in version with a stiffened back for traditional 24" by 24" ceiling grids, or a unique glue-on version that you can glue directly onto hard, reflective ceilings and walls.

This means that you can have SONEX ceiling tiles, even if you don't have a grid.

To install the drip-in tiles, just pop them into a standard grid. To install the glue-on tiles, just apply adhesive to the back of each tile and press in place.

## Hypalon Coating

We paint our drop-in and glue-on tiles with a unique hypalon (synthetic rubber) based paint. That means you can clean them with a damp sponge. Colors include white, gray black and almond.

## Plenty of Patterns

Choose patterned or flat tiles, or mix them together to create your own unique pattern.
