

# SONEX Value Line Foam & Baffles

## What is SONEX Value Line?

SONEX Value Line is a material that's designed to do one thing very well—absorb noise. SONEX's microscopic cells and patented surface pattern combine to create a material uniquely suited to absorbing echoes and reducing noise.

SONEX Value Line is made from our melamine acoustical foam—a fireproof, long-lasting material that SONEX uses to make most of its products. Value Line, with its subtle version of the SONEX pattern, is our most economical fireproof foam.

## Where Is Value Line Used?

Value Line is used to reduce echoes and bring down noise levels. You'll find it in restaurants, churches, conference rooms, meeting halls, gymnasiums and factories—anywhere it's too noisy or too reverberant.

## Install It Yourself

Just apply caulking-gun adhesive to the back of each sheet and press in place.

## Colors and Thicknesses

Value Line is available in natural white and gray, or painted with our cleanable HPC paint.

SONEX Value Line comes in three thicknesses:

- ▶ Use 35 mm for most applications, including pro audio and higher-frequency noise.
- ▶ Use 53 mm for mid-frequencies such as music or when wall space is limited.
- ▶ Use 60 mm for low-frequency noise.

You can also buy Value Line in 2" thick "baffles"—double sided sheets with hooks on the corners enabling you to hang them from ceilings.
