

SONEXpyramid

Seamless acoustical treatment

What is SONEXpyramid?

SONEXpyramid is a material that's designed to do one thing very, very well—absorb noise. SONEX's microscopic cell structure and surface pattern create a material uniquely suited to absorbing echoes and reducing noise.

What is Pyramid Made From?

SONEXpyramid is available in fire-retardant urethane (a durable, soft acoustical foam) or fireproof melamine (a paintable acoustical foam that meets even the strictest fire codes). Both materials are optimized for sound absorption.

How is SONEXpyramid Used?

SONEXpyramids create perfect audio in recording studios, reduce echoes in conference rooms and gyms, and lower noise levels in workplaces. And SONEXpyramid's surface pattern flows perfectly from sheet to sheet, creating a seamless installation. Restaurants, schools, laboratories—all use our Pyramids for better sound and less noise.

Sizes and Colors

SONEXpyramid is made in 24" by 24" sheets, which can be shipped via UPS.

Urethane SONEXpyramid is available in charcoal and brown. Melamine SONEXpyramid is available in natural white and gray, or painted a variety of colors with our cleanable HPC paint.

We make SONEXpyramid in three thicknesses, allowing you to choose the best material for your application.

- ▶ Use 2" for most applications, including pro audio and higher-frequency noise sources.
- ▶ Use 3" for mid-frequencies such as music or when wall space is limited.
- ▶ Use 4" for low-frequency noise.

Easy to Install

Just place a few beads of adhesive on the back of each sheet and simply press in place.
